Critical Bug Reports & Analysis

BUG-001: Validation Failure on: Verify SSL Protocol Security & Load Performance

Test Case Association:	TC-005
Severity Level:	CRITICAL
Root Cause Hypothesis:	The website does not force HTTPS redirections or does not support SSL protocols, exposing user connection data to network interception.
Suggested Correction:	Install valid SSL certificates on the server (e.g. Let's Encrypt) and force HTTP to HTTPS redirection using webserver config files (Nginx/Apache).
